IDEAL
FOOD”

ALLOFZ INTERNATIONAL LLP was incorporated in 2022. The food processing company originated from a multi-Restaurant Brand (QSR) located in **RAJKOT, GUJARAT, INDIA** with over 10 years of experience in food Products. Additionally, the group has been doing contract farming for more than 20 years. Being a farmer, we are closely associated with farmers, suppliers, distributors, and consumers to envision as Global pioneers of a food brand. We are introducing our brand name "**AAZITO**" under the **Allofz Group's** aegis to become a worldwide recognized food brand. We would want to present some high-quality, healthful foods, like peanut butter, unique retort packs of sterilized sweetcorn kernels and pulses, canned vegetables, canned beans, canned fruits, Ground Spices, cooking paste, and ready-to-eat dishes from Indian cuisine.

The **ORIGIN OF THE NAME** :

AAZITO

the Aazito name is made with different core Words which are Aaz, Zito, and Eito (ito). Every word has a strong meaning value.

Aaz is the Indian Word and it means Today. Since the establishment of the company, our Thought is "For your better tomorrow work Properly today."

ZITO is the Italian word and it means Younger. Aazito's thought on Younger is "Your hard work Is to reflect and inspirational for the younger Generation."

EITO(ITO) is the Japanese word it means Excellence. Aazito thinks, "Excellence's always Graceful, even if it isn't always beautiful."

VISION

Aazito aspires to be recognized as a global food company that promotes healthy living and aims to pioneer India's food brand. Aazito envisions extending its love to other countries with its cuisine and food lifestyle.

MISSION

Aazito's mission is to increase awareness about sustainable farming and job possibilities. We work hard to guarantee that our farmers have a bright future. From Farmer's Crop to the Client's Plate, Aazito is always spreading Happiness.

WHY US ?

Ingredients:

AAZITO products are always made From Non-GMO (Sans GMO) Vegetables and Fruits. Materials are also Procured from Audited Vendors and Farmers, and also our Sourcing Suppliers maintain Quality. Our major final product is made without preservatives and colors.

Developments:

We Constantly Develop our Products for achieved good taste and grab the trust of customers. We have an R&D team who develops the products as per customer needs, our suppliers also help us to make healthy products.

Sustainability:

AAZITO's most of the packing is made with advanced hygiene technology and Eco-Friendly Material so easy to dispose of and good for environmental health. In food processing companies have waste on large scale, but we consider it an opportunity for farmers to make Organic fertilizer.

Infrastructure & Standardization:

AAZITO Portfolio of products always meets international standards like ISO:22000 and ISO:9001. We follow the GMP and HACCP for making Enhance Products. We and our suppliers are also certified by Indian APEDA and Spice Board, US FDA, European BRCGs with A-Grade, and Gulf Halal.

Portfolio:

AAZITO have different types of products to meet clients' needs, as per export business we are the first priority for a large portfolio of grocery products. We also provide private labeling services as per customers' needs.

{ Sterilized }

Sweet Corn Kernels:

The maize used to make Aazito's boiled kernel sweet corn is all-natural and fresh. This product is produced using sterilizing technology without the use of artificial flavors, colors, or preservatives. This is ready-to-eat sweet kernel corn so, you can just open it and eat it at any time anywhere. Aazito Sweetcorn in cup pack is available in Different five flavors - Cheese Garlic, Butter & Pepper, Peri Peri, Lemon Chat, and Schezwan. Sweet corn has a lot of dietary fiber and vitamin C, an antioxidant that guards against cell damage and heart attack-related illnesses. Aazito Kernel Sweet Corn Is good for health and easy to digest.

Pulses

Sterilized pulses from Aazito's are offered in a retort pouch pack. As a result, it is convenient to care for and easy to transport. All of Aazito's Sterilized pulses are 100% natural and loaded with nourishing fiber. The same sterilizing method is also used in the packaging of pulses, which improves shelf life. You may utilize this pack anytime, anywhere because it is ready to use.

Vegetables

Sometimes vegetables are not available the whole year and are sometimes easy to access, in this circumstance canned vegetables are a healthy solution for a human being. Canned vegetables are nutritious as fresh and easily digested than their fresh counterparts. with the canning process (sterilizing Process) Vegetables lose their hazardous microorganisms that's why shelf-life increases as well. Aazito's canned vegetables are very convenient for instant cooking.

Pulses

Those things that happen with vegetables also happen with Pulses. There is the same solution required is to sterilize the product between 120°C (248°F) to 130°C (266°F). Aazito is using steam sterilizing process which is good for destroying hazardous microbiological bacteria. We are sourcing from handpicked fresh sources and then developing to make shareable things. In Aazito's portfolio, varieties of pulses are available. Aazito's canned pulses are good for instant cooking.

Fruits

In Fruit processing method is also the same as for vegetables and beans. Aazito's Kesar mango is harvested from Junagadh Gir District of Gujarat which is famous for its Dense Forest, Asian Lions, and Kesar mango. Aazito also provides Alphonso mango which is cultivated in the Ratnagiri district of Maharashtra. Alphonso mango is much sweeter than Kesar mango. if you like mild in sweetness then go with Kesar and if you like rich in sweetness then go with Alphonso.

Ground Spices

Aazito is sourcing spices from their farms. Our farms are located in Gondal, Gujarat, famous for their spices. Aazito's spices are ground with cold grinding technology which is stable at 40°C (104°F) to 45°C (113°F). In the normal grinding method temperature is reach up to 120°C (248°F), Spices begin to lose their pungency and flavor at around 60°C(140°F). Our technology preserves the test and aroma of spices as well. Therefore, you only need the least quantity of spices to create great food.
